HARDY-FLOWERING
Perennials, Roses

Shade and Flowering Trees
Shrubs, Hedge Plants, Vines, Evergreens
Fruit Trees, and Small Fruits

THE BRISTOL NURSERIES, INC.
BRISTOL : CONNECTICUT

Hardy Plant Section, Bristol Nurseries

The Bristol Nurseries, Inc.

BRISTOL, CONN.

THE BRISTOL NURSERIES are located on Pinehurst Road, Chippins Hill, two miles west of Bristol, and were formerly known as Paul M. Hubbard & Co. Nurseries. Increasing business necessitated a larger organization, and the business was accordingly incorporated in 1920.

Visitors are always welcome at the Nurseries and may visit without feeling any obligation to purchase. Motorists can best reach the Nurseries by continuing from the Boulevard through School and West Streets, to Terryville Avenue, turn left and follow the Bristol Nurseries' road-signs. We suggest, as far as possible, that intending purchasers come and personally select plants desired.

Landscape Gardening. In addition to growing and dealing in all kinds of plants, we are well equipped to make ornamental plantings, and will gladly prepare plans and estimates or furnish advice relative to residence plantings, the laying out of old-fashioned hardy gardens, rose-gardens, or the complete development of an estate.

Terms and Suggestions for Ordering. Please order as early as possible on receipt of this price-list. The planting season is all too short, and early ordering will enable us to make early delivery just as soon as planting conditions are right. Remittance may be made by post-office money order, check, or registered mail.

Express Shipments and Truck Delivery. We cannot assume responsibilities for express shipments, and goods travel at purchaser's risk after being received by the forwarding company. We will, however, give careful attention to the selection and packing of orders for shipment. Express shipments go forward at the purchaser's expense. **Parcel Post.** Small shipments east of the Mississippi will require approximately an additional 10 per cent to amount of order. **Local Orders** will be delivered by truck without charge and long-distance truck delivery can be arranged at a reasonable charge.

Please Note. We take every possible care to select only strong, healthy, true-to-name plants. The subsequent behavior will be dependent on their care and on conditions not within our control, and for that reason **we give no guaranty** as to results. Plants proving untrue to name will be replaced without charge. Customers unwilling to accept shipments on these conditions should return goods promptly.

Choice Hardy Perennial Plants

25 cts. each, \$2.50 per doz., \$15 per 100, unless otherwise noted

PLEASE NOTE.—Plant orders will be forwarded by express, purchaser paying charges, unless we are otherwise instructed. Small orders may be forwarded by parcel post. If wanted this way, please add 10 per cent to value of plants.

Aconitum (Monkshood)

Fisheri. Forms a bushy clump 1½ feet in height. Large light blue flowers in September and October. Valuable for planting in semi-shaded spots. 35 cts. each, \$3.50 per doz.

Anchusa (Bugloss)

Italica, Dropmore. An effective garden plant. Pretty gentian-blue flowers in June on pyramidal branchy spikes, 3 to 5 feet in height. 35 cts. each, \$3.50 per doz.

Anemone japonica Japanese Windflower

Valuable garden plants, blooming from late August until severe frost; also desirable for cutting purposes. Plants grow 2 to 3 feet in height. Do not attain their best until thoroughly established, and are at home in any good garden soil which is well drained.

Alba. Pure, snowy white, single flowers.

Prince Henry. Deep pink.

Queen Charlotte. Large, semi-double flowers, La France pink in color.

Whirlwind. Semi-double, pure white flowers.

Aquilegia (Columbine)

Long-spurred Hybrids. We offer an unusually choice strain of these lovely hybrids, ranging in color tones from creamy white and yellow to bronze-red and blue shades. No two plants resemble each other in color, and the combination of shades found in this selection defies description. In choosing stock plants we invariably regard a thrifty, robust growth of equal importance to color and well-developed spurs. Visitors at our nursery, when these are in bloom, are most favorably impressed with this superior strain.

Cærulea. Rocky Mountain Columbine. Blue and white long-spurred flowers. Strong plants, will bloom this season.

Hardy Asters

The following four varieties are improved forms of the native wild Aster, common to our New England roadsides, and conspicuous during late summer and fall, and should not be confused with the better-known summer-flowering or China Aster.

Climax. Lavender-blue, with golden yellow center; branches gracefully recurving when in full bloom. One of the best. Height, 4 to 5 feet.

Glen Eyrie. Mauve-pink. A very effective variety, attaining a height of 6 to 7 feet.

Mrs. F. W. Rayner. Large, rich rosy crimson flowers in September and October. Height, 4 feet.

Thomas Ware. Rosy lilac. Very effective. Height, 3½ to 4 feet.

Dwarf Hardy Asters

Alpinus. Neat tufts of purplish blue flowers during May and June. Useful for rockeries. Height, 6 to 9 inches.

Lutetia. A rare and beautiful variety of hybrid origin, completely covered with pretty lilac-rose flowers, 2½ inches in diameter, from late August until October. Height, 2 feet. 35 cts. each, \$3.50 per doz.

Mauve Cushion. An attractive Japanese variety of dwarf, spreading growth, seldom exceeding 9 inches in height. Delicate, soft mauve flowers, with silvery white reflection, produced in great volume in late October and November. 35 cts. each, \$3.50 per doz.

Subcæruleus. Violet-blue, with distinct orange center. Useful for cutting. Height 1½ feet.

Astilbe (Spiræa)

These are robust-growing plants of branching habit, producing graceful, feathered heads of flowers during late June and July. They do well in any good garden soil, and are very useful for cutting.

Juno. Deep violet-rose plumes; strong, erect growth. Height, 2½ feet.

Kriemhilde. Salmon-rose; very beautiful. Height, 2½ feet.

Rose Perle. Shell-pink; dense, pyramidal trusses. Height, 2½ feet.

Queen Alexandra. Light rose-pink; very free. Height, 2 feet.

50 cts. each, \$5 per doz.

Long-spurred Hybrid Columbines

Hardy Chrysanthemums

DECORATIVE TYPE

These are larger, more showy, and usually earlier in flowering than the Pompon or Button type. Very desirable for cutting. We recommend a selection from the following kinds for New England gardens.

Alice Howell. We consider this one of the very best garden Chrysanthemums. Flowers are single, produced in good sprays, and are of a wonderful rich shade of orange-yellow, an unusually effective garden color, and it can be depended upon to flower before severe frost sets in.

Ruth Cumming. Another garden variety of exceptional merit, rich reddish bronze in color. Growth is dwarf and compact. An unusually free-flowering variety, and altogether dependable for the garden. We consider this the best Chrysanthemum for cutting.

Aquitaine. Salmon-bronze.

Cranford's White. Large, pure white flowers.

Maduse. Terra-cotta-bronze; large.

Miss F. Collier. Pure white.

Normandie. Delicate pink.

Yellow Normandie. Bronzy yellow; extra good.

BUTTON OR POMPON TYPE

Eden. Rosy pink; large.

Excelsior. Bright yellow.

Golden Climax. Orange-yellow.

Dianthus Alwoodi, Jean

Harvest Moon. Yellow.

Lillian Doty. Pink.

Maid of Kent. White.

Mariana. Large; white.

November Gold. Rich yellow; large flower.

Upper, Mariana Chrysanthemum;
Lower, Ruth Cumming

Dianthus. Hardy Garden Pinks

NEW HARDY CARNATION PINKS

Dianthus Alwoodi

A splendid addition to our list of hardy garden plants. This type, the product of an English specialist, is the result of crossing the carnation and the more hardy June Pink. The flowers almost equal the carnation in size, are carried on long stems suitable for cutting, and are deliciously fragrant. The flowers are produced in quantity during June and July, and intermittently from then until severe frost appears. We find these varieties entirely hardy, and feel that when better known they will entirely supplant the older garden Pinks. All of the following kinds are distinct and desirable.

Harold. Pure white; very large, double.
Jean. Double; white, with a distinct crimson center.

Mary. Delicate rose-pink, maroon center; double.

Robert. Rose-pink, maroon center; single flower resembles a June Pink.

We offer heavy, two-year plants at 50 cts. each, \$5 per doz., \$35 per 100. Smaller size, will bloom this season, 30 cts. each, \$3 per doz., \$18 per 100.

OLD-FASHIONED HARDY PINKS

Plumarius. *June Pink.* Large flowers with spicy fragrance.

Plumarius, Rose of May. Pretty double pink flowers, clove-scented.

White Reserve. Pure white; double.

DWARF CUSHION PINK

Dianthus cæsius × **plumarius**. We secured this variety from Europe some years ago under this somewhat awkward name. It is a gem for the rockery. The growth is compact, extremely dense, and of true cushion formation. Unlike most plants of this type, it will not decay or damp off at the center during wet weather. Five-year-old plants in the nursery are still in perfect condition. Flowers vary from light to bright pink, completely obscuring the plant in early May. Strong plants, 35 cts. each, \$3.50 per doz., \$25 per 100.

Delphinium (Larkspur)**BRISTOL HYBRIDS**

The Delphinium is, we believe, the most satisfactory of all border plants and is deserving of special care. It does not do well under congested conditions. A rich soil is desirable, but the roots must not come in contact with manures. Bone-meal should be well mixed into the soil before planting and a light application made after each crop of flowers is cut. If these are cut close to the ground, new flowering growths will appear from the base of the plant, and, with proper care, will continue until frost.

Grown from seed selected with the utmost care from vigorous hybrids, we believe this selection will contain kinds that are fully equal to many of the best named varieties, with the advantage of added vigor. It is a fact that the finer European named varieties, which must be propagated from division or by cuttings, are prone to deteriorate in the process, and are not fully at home under our more changeable climatic conditions. Our hybrid strain includes a range of lovely colors varying from azure-blue to deepest purple, mauve-pink to rosy lavender. Many are semi-double, with distinct centers. All are strong and vigorous in habit, and, when well established, stately spikes attaining a height of 7 feet are not unusual.

Strong, field-grown plants of the above Bristol Hybrids, 35 cts. each, \$3.50 per doz., \$25 per 100.

Mixed Hybrids. A good mixed strain, but not equal to Bristol Hybrids. 25 cts. each, \$2.50 per doz., \$15 per 100.

Belladonna. Beautiful shade of light or turquoise-blue. Flower-spikes are of medium height, but are produced with great freedom from the end of June until hard frost. Valuable for either garden effect or as a cut-flower.

Bellamosum. A dark blue form of Belladonna.

Digitalis (Foxglove)

The Shirley. Those who admire the old-fashioned Foxglove will delight in this greatly improved strain of *Gloxiniæflora*. The flowers, unusually large in size, are daintily frilled, varying in color from white to deep rose-pink and are spotted crimson, maroon, and chocolate. It may be of interest to note that this fine strain was developed by the originator of the Shirley poppy. It has a very robust constitution and is, for that reason, valuable for New England gardens. Strong plants, will flower this season, 30 cts. each, \$3 per doz., \$20 per 100.

Gloxiniæflora. Foxglove. White, Pink, Purple, and Spotted.

Monstrosa. Mammoth Foxglove. Mixed colors.

Price of Hardy Perennials, 25 cts. each, \$2.50 per doz., \$15 per 100 unless otherwise noted

Gypsophila

Paniculata fl.-pl. *Double Baby's Breath.* In every way superior to the well-known Baby's Breath. Fine for garden decoration but invaluable for cutting. The flowers are larger, pure white, and when cut may be dried and kept indefinitely. The dainty, mist-like sprays usually appear when sweet peas are at their best and are invaluable in combination with other garden flowers. This variety cannot be depended on to come true from seed, and for that reason the true type will always be scarce, as it is difficult to propagate. We offer strong, two-year-old plants grown from cuttings, and guaranteed true to name, at 50 cts. each, \$5 per doz.

Paniculata. *Single Baby's Breath.* Like the above, with single flowers.

Hybrid Delphiniums

Hibiscus (Mallow Marvels)

A great improvement on our native Mallows. Flowers average 10 to 12 inches across and are gorgeously colored. These Mallows are at home as a water-edge plant, but do equally well in the hardy garden or shrub border. The average growth is 5 to 6 feet. Strong, four-year roots, 50 cts. each, \$5 per doz.

Hollyhocks

We can supply large, healthy, rust-free plants of these stately garden subjects in mixed colors and with single flowers. The double varieties come in White, Rose-Pink, Yellow, Crimson, and Maroon. No old-fashioned garden is complete without them.

Exquisite. The flowers of this splendid new Hollyhock are very large, delicately curled and fringed, and entirely distinct from the familiar double Hollyhock. Flowers are peculiarly marked or blotched in colors varying from rose to dark purple. With white-margined petals, not unlike a pelargonium. 35 cts. each, \$3.50 per doz.

German Iris

Iris germanica

German or Liberty Iris

- Amas.** Rich violet-blue, very large flowers. 2 feet high.
- Aurea.** Chrome-yellow.
- Blue Jay.** Clear blue, shaded dark blue. 35 cts. each, \$3.50 per doz.
- Caprice.** Rosy red, yellow beard. 35 cts. each, \$3.50 per doz.
- Caterina.** Standards clear blue; falls soft lilac. The large flowers are borne on stout, branching stems over 4 feet high. 50 cts. each, \$5 per doz.
- Candelabre.** Lovely lavender-blue blooms dotted with darker blue. The flowers are large and distinct, making this an excellent variety for any collection. 50 cts. each, \$5 per doz.
- Halfdan.** Creamy white.
- Her Majesty.** Clear rose-pink, bright crimson falls; extra fine. 35 cts. each, \$3.50 per doz.
- Iroquois.** Smoky lavender and maroon. Fine erect habit. 35 cts. each, \$3.50 per doz.
- Juniata.** Clear blue; vigorous grower. 35 cts. each, \$3.50 per doz.
- King of Iris.** Lemon-yellow; satiny brown falls. Extra. 50 cts. each, \$5 per doz.
- Mandaliscæ.** Rich lavender-purple; large flowers; early. Height, 40 inches. 25c. each, \$2.50 per doz.
- Mme. Chereau.** White, edged light blue.
- Monsignor.** Rich satiny violet standards; velvety purple falls. 35 cts. each, \$3.50 per doz.
- Mrs. Darwin.** White, reticulated violet.
- Pallida Dalmatica.** Lavender, shaded blue. Very robust and fragrant. 30 cts. each, \$3 per doz.
- Pumila.** Very pretty dwarf species, flowering in April. Purple.
- Pumila Aurea.** Desirable yellow form of above.
- Quaker Lady.** Standards an odd shade of smoky lavender with shading of yellow; falls ageratum-blue and old-gold; beard and stigmas yellow. 50 cts. each, \$5 per doz.
- Queen of May.** Soft lilac-rose, almost pink. Tall grower. 25 cts. each, \$2.50 per doz.

IRIS GERMANICA, continued

- Rose Unique.** Bright violet-rose—the nearest approach to a true pink Iris. 50 cts. each, \$5 per doz.
- Sherwin Wright.** New. Golden yellow; very free and vigorous. Fine. 50 cts. each, \$5 per doz.
- Tecumseh.** Smoky violet, shaded yellow and buff. 35 cts. each, \$3.50 per doz.
- Violacea grandiflora.** Rich violet-purple. Fine.
- Any of the above Irises, 20 cts. each, \$2 per doz., \$12 per 100, unless otherwise noted

Iris Kaempferi (Japanese Iris)

Named kinds in assortment. 30 cts. each, \$3 per doz.

Garden Lilies · Lilium

- Auratum.** Golden-banded Lily of Japan. 50 cts. each, \$5 per doz., \$35 per 100.
- Speciosum album.** White. 50 cts. each, \$5 per doz., \$35 per 100.
- Speciosum rubrum.** White, spotted crimson. 50 cts. each, \$5 per doz., \$35 per 100.

NEW HARDY LILY (*Lilium regale*)

Undoubtedly this new Chinese Lily will prove one of the most satisfactory of all garden Lilies. It blooms in July when flowers are not over-abundant, and, when established, attains a height of 5 feet, producing large, trumpet-shaped, fragrant flowers not unlike the Easter Lily, ivory-white in color, with pink and soft yellow shadings. Unlike the Japanese Lilies, it improves from year to year and actually increases its bulbs, so that every third or fourth year the bulbs may be taken up, reset, and the planting enlarged. Strong flowering bulbs, 75 cts. each, \$7.50 per doz., \$50 per 100; extra-large bulbs, \$1 each, \$10 per doz.

Lupine

Lupine · Lupinus

Polyphyllus. *Lupine.* Handsome blue flower-spikes.

Polyphyllus albus. White.

Polyphyllus roseus. Pink.

35 cts. each, \$3.50 per doz., \$25 per 100

NEW LUPINES, REGAL HYBRIDS

This new strain of hybrid Lupines of English origin has attracted a great deal of attention from European garden lovers. Those who are familiar with the white, blue, and pink Lupines—a favorite in American gardens—will welcome the new colors introduced in this strain, comprising creamy whites, amber, coppery orange, salmon-rose, lavender-blue, and many bicolored sorts. These do not come strictly true from seed and cannot be offered in separate colors, but all are entirely desirable. Strong plants, will flower this season, 50 cts. each, \$5 per doz.

Oriental Poppy · Papaver orientalis

Poppies after flowering in June, die down until early fall, when the foliage reappears, and they require two seasons to get properly established.

Choice Mixed. Gorgeous flowers in numerous shades including White, Salmon-Pink, Flaming-Scarlet, and Dark Crimson.

Iceland Poppies, Giant Sunbeam Strain. A distinct improvement over the original Iceland Poppy, varying in color from white to bright orange, flowering in early May and intermittently through the season. 25 cts. each, \$2.50 per doz.

Pæonia · Peony

In planting this fine old favorite, provide a good soil, deeply dug and enriched with well-decayed manure, to which a sprinkling of bone-meal should be added. The fertilizer should not come in direct contact with the roots, and the plants should be set just deep enough to cover the crowns. While the large two-year plants offered should bloom the first season, it requires from two to three years before the flowers will appear in their true form. We offer some very choice kinds in addition to the older varieties. All are good.

50 cts. each, \$5 per doz., unless otherwise noted

Albatre. Pure white petals, edged carmine. Extra fine. 75 cts. each, \$7.50 per doz.

Asa Gray. Flesh-color, sprinkled with carmine.

Couronne d'Or. White; golden stamens.

Duchesse de Nemours. Pure white; large and fragrant.

Edulis Superba. Deep rose-pink. Early.

Festiva Maxima. Waxy white, flecked carmine.

Felix Crousse. The best bright red. 75 cts. each, \$7.50 per doz.

Livingstone. Pale lilac-rose, tipped silver and flecked carmine. Very free and vigorous. \$1 each.

Marguerite Gerard. Pale hydrangea-pink, minutely marked dark crimson. Medium height; free flowering. Late. \$1 each.

Meissonier. Brilliant purple-red, center deep crimson. 50 cts. each.

Mons. J. Elie. Lilac-rose, silvery reverse. Very large. \$1 each, \$10 per doz.

Officialis Rubra. This is the old-fashioned early-flowering variety. Large, full, deep crimson flowers; very fragrant. Stock limited. \$1 each.

Prince Imperial. Amaranth-red. Very good.

Triomphe de l'Exposition de Lille. Pale pink, splashed rose. 75 cts. each, \$7.50 per doz.

Hardy Phlox

Given good soil and divided every two or three years, these splendid hardy plants will not deteriorate. Their gorgeous colors are invaluable to the garden from midsummer until late in the season. During dry periods water should be applied copiously. If mildew appears during changeable weather, coating the leaves with a white powdery substance, spray with liver of sulphur (sulphide of potassium), 1 ounce to 3 gallons of water, to which a little soap should be added. Plant 1½ to 2 feet apart.

PHLOX, JULES SANDEAU

An extra-choice variety, bearing very large trusses of pure pink flowers. The individual florets, in comparison with other kinds, are conspicuously large and pure in color. Growth is robust, medium in height, and very free-flowering. We consider it the best Phlox in this color. Visitors are quick to select this as the best of all the pink Phloxes. Strong plants, will flower this season, 35 cts. each, \$3.50 per doz., \$25 per 100.

B. Comte. Brilliant French purple. The best Phlox in this color. 35 cts. each, \$3.50 per doz.

Bridesmaid. White, distinct crimson eye.

Coquelicot. Orange-red.

Elizabeth Campbell. Light salmon-pink, dark red eye. Extremely choice. 35 cts. each, \$3.50 per doz.

Frau A. Buchner. Extra-good white.

Goliath. Carmine-crimson, red eye. Very strong.

Gruppenkonigen. Flesh-rose.

Josephine Gerbeaux. White, red eye.

Louise Abbema. Dwarf; pure white.

Miss Lingard. Pure white flowers from May on. Glossy foliage.

Mme. P. Dutrie. Soft lilac-pink.

Pantheon. Bright carmine-rose.

Rheinlander. Salmon-pink; very large trusses. 35 cts. each, \$3.50 per doz.

Riverton Jewel. Mauve-rose, carmine-red eye.

Hardy Phlox

HARDY PHLOX, continued

Rynstrom. Rose-pink.

Special French. Beautiful shade of clear pink of vigorous habit. 35 cts. each, \$3.50 per doz.

Thor. Salmon-pink.

Phlox Divaricata canadensis. Completely covered with fragrant lavender flowers during April and May. Height, 10 inches. Splendid for massing. 25 cts. each, \$2.50 per doz.

Phlox Subulata. *Moss Pink.* Excellent for the rockery. Covered with flowers in early spring. White, Lavender, and Pink. 20 cts. each, \$2 per doz., \$15 per 100.

Pyrethrum

Hybridum. *Colored Daisy.* One of the fine old-fashioned garden flowers, doing well in any good garden soil fully exposed to the sun, flowering freely in June, and more or less during the autumn months. Colors include White, Pink, and Red, but can be supplied in mixed colors only. Height, 2 feet.

Uliginosum. *Giant Daisy.* Large, pure white flowers from July to September. Height, 3 to 4 feet.

General List of Hardy Perennials

All perennials 25 cts. each, \$2.50 per doz., \$15 per 100, except where otherwise priced

ACHILLEA (Yarrow), Boule de Neige. Splendid for massing and for cutting.

Perry's White. For massing or cutting.

ALYSSUM saxatile compactum. Yellow; dwarf.

ARABIS alpina fl.-pl. *Double Rock Cress.* Pure white, double flowers. Dwarf.

ASCLEPIAS tuberosa. *Butterfly Weed.* Orange-scarlet.

BOLTONIA. *False Chamomile.* Showy plants of tall growth, flowering in late summer.

asteroides. White.

latisquama. Lavender.

CAMPANULA carpatica. *Carpathian Bells.* Bright blue, cup-shaped flowers. Dwarf habit.

carpatica alba. Pretty white form of preceding.

Medium. *Canterbury Bells.* We can supply these ever-popular favorites in White, Pink, Lavender, Blue, and Mixed colors.

Medium calycanthema. *Cup-and-Saucer.*

White, Pink, Blue, and Mixed Colors.

Persicifolia. *Peach Bells.* White or blue.

CERASTIUM tomentosum. *Snow-in-Summer.*

Silvery foliage; white flowers; dwarf.

CHELONE Lyonii. *Turtlehead.* Rose-purple flowers.

ECHINOPS Ritro. *Globe Thistle.*

ERYNGIUM amethystinum. *Sea Holly.*

ELSHOLTZIA stauntonii. *Mint Shrub.* Lilac-purple flowers in late fall. Aromatic foliage and shrub-like habit. Clumps, 50 cts. each, \$5 per doz. Plants from small pots, 25 cts. each, \$2.50 per doz.

EUPATORIUM (Conoclinium) celestinum. *Hardy Ageratum.* Light blue flowers from August on.

FUNKIA subcordata grandiflora. *August Lily.* White, lily-shaped, fragrant flowers. 50 cts. each, \$5 per doz.

media picta. Showy green-and-white foliage.

cærulea. Light blue flowers.

GAILLARDIA grandiflora. *Blanket Flower.* Showy flowers, varying from golden yellow to crimson.

Sweet William

We can supply this fine old-fashioned favorite in plants grown from the choicest European strains available, and almost true to color.

Diadem. Crimson, pure white eye.

Newport Pink. Effective shade of salmon or water-melon-pink.

Pure White. Very large flowers.

Scarlet Beauty. Rich deep scarlet.

Mixed. Including all colors.

Veronica · Speedwell

Blue Ridge. A new variety of medium height. Bright blue flowers on handsome spikes. Very desirable for cutting.

Longifolia subsessilis. *Giant Speedwell.* Long, dense, deep blue spikes from July to September. An extra-good garden subject. 35 cts. each, \$3.50 per doz.

Spicata. Compact habit, growing about 1½ feet in height. Attractive spikes of bright blue flowers in June and July. Very free.

Spicata rosea. Form of the above with delicate pink flowers.

Garden Roses

Mrs. Charles Bell Rose

Hybrid Perpetuals

These are of the more sturdy type of Roses, and for the average garden are the most desirable. A mulch of manure or leaves should be supplied in late November. From one-half to two-thirds of the wood should be cut away, and the weak branches removed entirely in early spring. Those marked * will flower again in autumn.

Strong, 2-yr. plants, 90 cts. each, \$9 per doz.

***Frau Karl Druschki.** Pure white—the best of its color.

General Jacqueminot. The popular scarlet "Jack Rose."

***George Arends.** Rose-pink Frau Karl Druschki.

***Gloire de Chedane Guinoisseau.** Velvety red. New.

Hugh Dickson. Crimson-scarlet.

***Mrs. John Laing.** Soft pink. Extra good.

***Mrs. R. G. Sharman-Crawford.** Rosy pink. Very free.

***Paul Neyron.** Dark rose; enormous size.

Prince Camille de Rohan. Deep crimson.

***Ulrich Brunner.** Cherry-red. Vigorous and free.

Everblooming Hybrid Tea Roses

These are more continuous in flowering and almost as hardy as the preceding kinds. Prune hard in early spring and cut back flower-stems half way during summer as the flowers wither. Protect in winter with soil, leaves, or manure.

Strong, 2-yr. plants, 90 cts. each, \$9 per doz.

Columbia. New. Glowing pink.

Duchess of Wellington. Saffron-yellow.

Etoile de France. Deep crimson.

General MacArthur. Crimson-scarlet.

Gruss an Teplitz. Scarlet-crimson. Very free.

Jonkheer J. L. Mock. Carmine-pink.

Kaiserin Auguste Victoria. Creamy white.

Killarney. The favorite pink.

Lady Alice Stanley. Deep coral-pink. Very free.

Mme. Caroline Testout. Satiny pink.

Mme. Edouard Herriot (Daily Mail Rose). Coral-red. Distinct.

Mrs. Aaron Ward. Indian-yellow, shaded cream. Very free.

Mrs. Charles Bell. Shell-pink. Extra good.

Ophelia. Salmon-rose. A grand Rose.

Radiance. One of the best. Carmine-pink.

Red Radiance. A fine cerise-red.

Red-Letter Day. Semi-double; scarlet-crimson. Very free and showy.

Souv. du President Carnot. Light pink.

White Killarney. White.

Hardy Roses

Growing Plants from Pots

We offer strong, growing plants from pots, in bud or bloom, ready for planting after May 15. These are lighter than the 2-year budded stock offered above, but much stronger and sturdier than 1-year-old pot Roses offered by mail-order houses, plants which, with reasonable care, will flower well and give splendid results the first season. Good stock for those who wish to grow Roses at a reasonable expenditure or to make replacements in the established Rose-bed. We fully believe this stock can be planted more successfully by the amateur than the dormant field-grown plant.

Before planting, soak the ball of earth thoroughly. Plant in good soil, enriched with well-decayed cow-manure, and sufficiently deep to cover the ball of earth 2 to 3 inches. Tramp the soil thoroughly (this is important), water copiously, and frequently cultivate the surface to a depth of 1 to 2 inches.

We can supply these pot plants in the following kinds: Columbia, Duchess of Wellington, Etoile de France, General MacArthur, Jonkheer J. L. Mock, Lady Alice Stanley, Mme. Caroline Testout, Mrs. Aaron Ward, Mrs. Charles Bell, Ophelia, Panama, Radiance and Red Radiance. 75 cts. each, \$7.50 per doz., \$50 per 100. Three of a kind at the dozen rate, 25 at the 100 rate.

NEW ROSE, MARY WALLACE

This is a charming new Rose, whose interesting history is fully covered in the American Rose Society's 1924 Annual. Following is the official description given by the Department of Agriculture.

"Mary Wallace (W. C. 124). Pillar rose type. Makes a fine, strong, self-supporting rose 6 to 8 feet high, with large, glossy foliage, resistant at Bell to all diseases. Blooms with great freedom in spring, and bears a considerable number of fine buds in summer and fall. Flowers well-formed, semi-double, bright, clear rose-pink, with salmon base to the petals. Largest in size of any Wichuraiana hybrid, generally exceeding 4 inches in diameter. Hardy; readily propagated. Has been tested at Bell Station, Md.; Portland, Ore.; Syracuse, N. Y.; Harrisburg, Pa., and Hartford, Conn."

Strong, 2-yr. plants, \$2 each

Climbing Roses

Strong, 2-yr. plants, 75 cts. each, \$7.50 per doz., unless otherwise noted

American Pillar. Rose-pink, distinct white eye.

Christine Wright. Large, double, apple-blossom-pink flowers.

Climbing American Beauty. Large, rosy crimson flowers.

Paul's Scarlet Climber Rose

CLIMBING ROSES, continued

Crimson Rambler. The well-known crimson climber.

Dorothy Perkins. Soft shell-pink.

Dr. Van Fleet. Full, double flesh-pink flowers. Extra good.

Excelsa. Crimson-scarlet. Healthy, glossy foliage.

Hiawatha. Brilliant carmine, distinct white eye. Single.

Lady Gay. Soft pink.

Paul's Scarlet Climber. A new climber of exceptional merit. Vivid scarlet, semi-double flowers. Two-year plants, \$1 each.

Silver Moon. Large silvery white, single flowers.

Tausendschon (Thousand Beauties). Soft pink, turning to carmine.

White Dorothy Perkins. A white duplicate of Dorothy Perkins.

Miscellaneous Roses

BABY RAMBLER ROSES, EVERBLOOMING.

White, Pink, Red. 75 cts. each, \$7.50 per doz.

MOSS ROSES. White, Pink, Red. 75 cts. each, \$7.50 per doz.

RUGOSA ROSES AND HYBRIDS. *Rugosa*

Red and *Rugosa* White. 60c. each, \$6 per doz.

Blanc Double de Coubert. Fine double white.

Conrad F. Meyer. Silvery pink. \$1 each, \$10 per doz.

F. J. Grootendorst. A hybrid of *R. rugosa* and Baby Rambler. Strong shrubby grower with ever-blooming Baby Rambler habit. Good crimson color and absolutely hardy. A fine hedge Rose. 2-yr. plants, \$1 each, \$10 per doz.

Rosa Hugonis. A very attractive Rose species recently introduced from China, producing dainty, soft yellow, single flowers, in long sprays early in May—the earliest rose to bloom. Shrub-like in growth, it should be planted in the border, not the Rose-garden. Medium size, \$1 each.

Choice Flowering Shrubs

ACANTHOPANAX pentaphylla.	Each	Doz.
<i>Fine-leaved Aralia.</i> Glossy green leaves; prickly branches. Does well in shade.		
2 to 3 ft.	\$0 50	\$5 00
3 to 4 ft.	75	7 50

Evergreens

The demand for Evergreens for foundation planting is rapidly increasing. Evergreens are attractive winter or summer. Select the kinds adapted for this purpose, prune or shear at intervals, and they may be regarded as permanent.

NOTE.—Varieties preceded with * will develop into large trees, and should not be located near buildings but grouped separately or as specimens where their proper development will not be hampered.

	Each	Doz.

Hybrids. These can be supplied in White, Pink, Lavender, and Red. 2 to 2½ ft.	5 00	50 00
2½ to 3 ft.	7 00	70 00

Fruit Trees

NOTE.—When Fruit Trees are required in quantities of more than 100, write us for special prices.

NEW APPLE, THE CORTLAND

A valuable new Apple that will appeal both to the amateur and commercial grower. It is the result of a cross between Ben Davis and McIntosh. The fruit has the delicious flavor of the McIntosh as well as the firm, crisp, white flesh. The color is even more attractive—a deep red—and its keeping qualities are superior to McIntosh. All the requirements of a first-class table Apple. Stock very limited. Strong, 2-yr. trees, \$3 each.

NEW PLUM, IMPERIAL EPINEUSE

This attractive new reddish purple Plum is remarkable for its deliciously sweet flavor. Fruit is large and ripens in late midseason. It is very productive and has made a splendid showing at the Geneva Experiment Station. A fine table Plum which is, we believe, destined to be much in demand when better known. A large grower considers it the best Plum grown. Strong, 2-yr. trees, \$2 each.

Apples

5 to 7 ft. tall, 1½-in. diam. and up, \$1 each, \$10 per doz., \$75 per 100.

4 to 5 ft. tall, 1½-in. diam. and up, 75 cts. each, \$8 per doz., \$60 per 100.

NOTE.—Varieties are arranged approximately in the order of ripening.

Varieties marked * in extra large size at \$2 each \$20 per doz.

Dwarf Apples

Dwarf Apples are the standard kinds budded on a small rooting stock, the process having a tendency to restrict or dwarf the top growth. Dwarf trees commence fruiting earlier, bear larger fruit, and where space is limited, will produce more fruit than the standard Apples; because you can have more trees, space the trees 12 to 15 feet apart in the garden, or 6 to 8 feet as a hedge-row.

Varieties offered in Dwarf form:

Price \$1.25 each, \$12 per doz.

Red Astrachan.

Delicious.
